REVIEW BY THE CHIEF COMMISSIONER OF THE ANNUAL REPORT ON PUBLIC INSTRUCTION IN MYSORE FOR 1873—74.

1. During the past year there was an increase of 11 Government, 6 aided, and 43 unaided schools over the number shewn in the Report for 1872—73 ; and at its close there were in existence 670 Government, 104 aided, and 1,536 unaided schools, making a total of 2,310 schools of the three classes in the Province.

2. The number of pupils on the rolls in Government and aided schools aggregated 27,298, shewing an increase of 901 as compared with 1872—73. The number in unaided schools is reported to have been 18,914, making the total of pupils up to 46,212 on the rolls in all classes of schools. It is explained by Mr. Rice that the number of pupils shewn on the rolls during the year under review was reduced owing to the discovery of false returns. This unsatisfactory circumstance indicates the necessity of closer inspection, a subject which has been repeatedly urged and to which the Chief Commissioner will allude hereafter. The general results of the year, as shewn by the above figures, cannot but be regarded as fairly encouraging.

3. Of the total number under instruction, 43,592 were boys and 2,620 girls. Of these, the number of either sex in Government and aided schools aggregated 57 per cent and 94 per cent respectively, and stood classified as shewn in the margin.

	Boys.	Girls.	Total.
Hindus	...	...	22,621
Muhammadans	...	...	3,131
Others	...	...	1,546
Total	24,834	2,464	27,298

4. The average number of square miles of area to each school and the proportion of students to population of school-going age in each District are shewn below. In the whole Province there is one school for every 11·72 square miles on an average ; and 5·20 per cent of the boys between six and twenty, and 0·66 per cent of the girls between six and 12 years of age are under instruction. These figures include schools of all classes :—

	Area, Square Miles.	No. of Schools.	No. of Square Miles to each School.	Population of School-going age.	Students.	Percentage of Schools to Population of School-going Age.
Bangalore ...	2,914	416	7·02	197,239	13,199	6·65

	93,679	45,086	43,142	68,801
	181,907			

7. The total expenditure on the part of Government on education in the Province during the year under review was Rs. 2,43,372 as shewn in the margin, of which Rs. 55,799 or 29·7 per cent were debitable to Local and the remainder to Provincial Funds. The expenditure during the previous year was Rs. 2,39,375. Of the total expenditure, Rs. 1,18,007 were recouped to Government in the different shapes noted in the * margin. The net cost to the Provincial Exchequer thus amounted to Rs. 1,25,365.

	1872—73	1873—74

By allotment from Local Fund Cess ...	86,703
	1,18,007

8. Fifty-four candidates passed the several University Examinations noted in the margin. The Bachelor of Laws was formerly a student in the London Mission Institution. Eight of the F. A.'s and 23 of the Matriculates were sent up from Government and the rest from aided institutions. The High School at Bangalore as usual stands first both as regards the number that passed therefrom and in the proportion of the numbers passed to those examined. The District School at Shimoga and the Wesleyan Native Educational Institution at Bangalore, which are almost on a par, rank next.

9. In connection with the subject of University examinations the Director mentions certain changes which have been introduced by the Madras University in the Matriculation and First-in-Arts examinations, the tendency being to attach greater importance to the study of natural science. The Chief Commissioner has no doubt that, so far as the educational requirements of this Province are concerned, a still more decided move in the same direction might be made by the Senate with confidence and advantage. The curriculum pursued in the Madras University necessarily influences to a great extent the instruction given in the Mysore Provincial schools, and the Chief Commissioner will be glad to learn what arrangements have been made, or are proposed, for instruction in natural science in the Higher Class schools. The "School of Engineering and Natural Science" now being established at Bangalore will, it is hoped, in time supply a great want in this respect.

10. Of Government schools of the higher class there are still 7, one at the Head Quarters of each District, except Kadur. The High School at Bangalore and the Raja's School at Mysore, which teach up to the B. A. standard, have continued to work satisfactorily. The teaching staff in the latter has been augmented since the year under review. The remaining 5, which are called District Schools, are limited to the Matriculation standard of the Madras University, and have also shewn satisfactory results, those at Shimoga and Hassan continuing to hold their position in advance of the rest. The subjoined tabular statement embodies the more important of the statistics connected with the schools of the higher class :—

	Monthly Average Number on the Rolls.	Expenditure, Rs.	Total Cost of educating each Pupil.	School Fees realized	Net Cost to Government per Pupil.
High School, Bangalore	534	15,468	28-15- 4	4,741	20- 1- 3
Raja's School, Mysore .	222	9,428	42- 7- 5	1,968	33- 9- 8
District School, Hassan.	146	6,036	41- 5- 5	403	38- 9- 4
„ Túmkúr ...	102	3,013	29-10-11	527	24- 8- 4
„ Shimoga ...	203	3,882	19- 2- 0	627	16- 0- 7
„ Chitaldroog...	140	4,366	31- 2-11	540	27- 5- 2
„ Kolar ...	88	3,499	39-12- 3	247	36-14-11
Total.....	1,435	45,702	31- 2- 5	9,055	25- 8- 7

These figures afford useful comparison with those noted in the margin for 1872-73 for the Provincial schools of the Madras Presidency with which most of the Government schools of the higher class in Mysore correspond.

Provincial Schools.	Monthly Average Number on the Rolls.	Expenditure, Rs.	Total Cost of educating each Pupil.	School Fees realized, Rs.	Net Cost to Government per Pupil.
Combaconum...	338	24,342	72 0 3	13,297	41 13 6
Bellary ...	214	12,442	58 0 8	4,838	35 8 6

Mangalore ...	213	12,751	41 1 4	5,027	36 4 2

11. Of middle class Anglo-Vernacular schools, there are 6, educating up to a standard below Matriculation. They have 250 pupils between them on the rolls with an average attendance of 223, costing

Rs. 8,496, which gives a trifle above Rs 38, as the cost of educating each pupil. Rs. 596 were realized in the shape of fees, the net cost to Government per pupil thus amounting to Rs. 35—6—9. The School at Chikballapur stands foremost. The Director of Public Instruction should consider whether the backward condition of the other schools is not due to deficiency in the teaching staff, inasmuch as there are 4 masters at Chikballapur, while there are but 2 at each of the others, except Gundlupet where there is only one.

12. Of lower class schools there are 647, of which 638 are for boys and 9 for girls, having on their rolls 17,306 boys and 252 girls respectively. Of the schools for boys, 104 are Taluk schools, and 534 Hobli schools for elementary instruction. Of the former, 81 are Kanarese with 4,308 pupils on the rolls, 6 Telugu in the Kolar District, with a nominal roll of 238 pupils, and 17 Hindustani schools with a nominal roll of 777 pupils. The Taluk schools are divided into four classes as noted in margin. Twelve of the schools have reached the standard of the first or highest class, 53 that of the second, and 32 the third. The remaining 7 have not advanced beyond the lowest stage. The average number of pupils in the 104 Taluk schools during the past year was 4,705. The cost was Rs. 33,532, or Rs. 7—2—0 per pupil on an average. The fees realized having been Rs. 2,990, the net cost to Government per pupil was Rs. 6—7—10.

	Kanarese.	Telugu.	Hindustani.	Total.
1st Class	12	...	...	12
2nd „	46	2	5	53
3rd „	23	3	6	32
4th „	...	1	6	7
	81	6	17	104

13. The 534 Hobli schools had 11,983 pupils on the rolls on the last day of the year, or an average of 23 for each. The aggregate average daily attendance was 8,989 or 17 for each school; and although the number was very much larger at some schools, at others it was below 10, and in the case of some even lower.

Of the pupils attending these schools for elementary instruction five per cent were Muhammadans, and the rest, except a very small fraction, Hindus. The schools have been maintained entirely from Local Funds, and cost Rs. 45,031; which, taking the average daily attendance, gives a trifle above 5 Rs. as the charge per pupil. No fees are levied in Hobli schools. The Department has good reason to be proud of the success

achieved by this class of schools, which promise to supply Mysore with a system of primary education second to none in India. It is evident, however, that they require more inspection than falls to their share at present, and unless the inspecting staff is strengthened (a subject with which the Chief Commissioner will deal hereafter) any large increase in the present number of schools is a measure of doubtful advantage.

The Director's report is silent as to the degree of control exercised over these schools by the Sub-Deputy Inspectors.

14. The nine schools for girls are all elementary and almost entirely in the Bangalore and Kolar Districts, there being but one of them at Hassan. They have 252 pupils between them, all Hindus except three who are Muhammadans. 213 girls learn Kanarese and 39 Telugu. The schools are maintained from Provincial funds at a cost of Rs. 3,221 or Rs. 14—2—7 per pupil. The fees collected have been small amounting only to Rs. 6. The Director of Public Instruction remarks that no marked progress was made in any of these schools; first, because the institutions themselves are exotic, and, secondly, because it is impossible to get female teachers; and that the most successful instruction must be looked for in Mission Schools, which are under the superintendence of European ladies. This must be admitted to be an unsatisfactory state of things. The training of female teachers is doubtless attended with difficulty, but the difficulty is not insuperable, and if Brahman female teachers cannot be obtained owing to the prejudices of the class, an attempt might be made to train some from the Modaliar or other Sudra castes, or even to induce qualified East Indian women to take charge of Hindu girls' schools. The Chief Commissioner will be glad to receive well considered proposals from the Director of Public Instruction for stimulating native female education, at least in the first class towns of the Province. The subject is one, as remarked in para 20 of the Review on the Education Report for 1872, that requires to be dealt with cautiously, and the willing co-operation and aid of the native community are essential to its successful treatment. An intelligent interest in the furtherance of this important object on the part of the Native Officers of Government is equally necessary, and will, it is hoped, be generally forthcoming.

15. The only Normal School in operation throughout the year was the Hindustani School at Bangalore, where the average attendance was 12.

The school cost Rs. 1,938, or at the high rate of a little more than Rs. 161 per pupil, which was doubtless due to the limited number of pupils. The point seems however to need explanation. Two other Normal Schools for training Hobli school masters were opened at the close of the year.

16. The Engineering Classes at Bangalore and Túmkúr had between them an average attendance of 15, their cost being 790 or Rs. 52½ per pupil per annum. Three students from the class at Bangalore passed the Surveyors' Test.

17. Of private institutions under Government inspection and aid, there were 74 for boys, 29 for girls, and one for special education.

Subjoined is a comparative abstract of the numbers of this class of schools for the past and previous year:—

	No. of Institutions.	Pupils.		Expenditure.			Fees realized, Rs.
		Monthly Average on Rolls.	Average daily attendance.	Government aid, Rs.	Other aid, Rs.	Total Rs.	
1872—73	98	6,229	5,404	41,109	73,248	1,14,357	28,546
1873—74	104	6,617	5,710	43,142	68,801	1,11,943	22,102
Increase..	6	388	306	2,033	...	...	...
Decrease.	...	...	...	...	4,447	2,414	6,444

Thus, although there has been an increase in the number of schools and in the average daily attendance, as also in the grant-in-aid from Government, the fees realized have considerably fallen off, and the expenditure from other than Government sources is less by 6 per cent. The Director of Public Instruction's report affords no explanation of this important point.

18. Fresh grants-in-aid to the extent of Rs. 3,585* were sanctioned during the year, against a reduction of previous grants of Rs. 70 per mensem. There was thus a net increase of 2,745 Rs.; but as only Rs. 43,142 are shewn as the total amount of the Government aid in 1873—74, it would seem that only Rs. 2,033 was utilized in excess of the previous year's grant.

*Including building and furniture grants.

19. The following tabular statement gives the statistics of the several classes of aided schools during the year:—

Schools.	No.	Average Number of Pupils.	Cost of Maintenance.			Fees realized.		Average Cost of educating each Pupil.	
			Government Funds.	Other sources.	Total.	Total Amount.	Average per Pupil.	Total Charge.	Cost to Government.
			Rs.	Rs.	Rs.	Rs.	Rs.		
Higher Classes..	5	813	11,935	21,451	33,386	9,708	11-15-0	41-1-0	14-10-10
Middle do ...	8	521	5,040	11,303	16,343	2,488	4-12-5	31-5-11	9-10-9
Lower do ...	61	3,168	13,507	17,020	30,527	1,869	0-9-5	9-10-2	4-4-3
Female Schools	29	2,033	12,060	18,032	30,092	7,042	3-7-5	14-12-9	5-14-11

20. The higher and middle class institutions are reported to have made favorable progress, and they continue to do much useful work each in its sphere. Some of them, however, which are intended mainly for children of the European and Eurasian classes, are susceptible of improvement in the way of rendering the instruction imparted of a more useful and practical character.

The remarks of the Director in paras 78 to 89 of his report, on this and other points, in connection with the general character of the instruction afforded at these institutions and especially with reference to its adaptation to the children of the humble European and Eurasian classes merit special attention. The subject is engaging attention, and it appears to the Chief Commissioner that Mr. Rice's views on it, as so put forth, are sound and well grounded. It will be referred to again in the concluding part of this Review.

The lower class schools are also reported to be generally in a fair condition.

21. The defects in the working of particular institutions specially remarked on by the Director of Public Instruction have been brought to the notice of the managers, and the Chief Commissioner trusts that they have received due attention.

22. The increase reported in the number of unaided private schools is gratifying. Of the 1,536 schools of this class reported to be in exis-

tence, 1,439 are stated to be for Hindus and 47 for Muhammadans. Their income has been Rs. 54,344, the greater portion, *viz.* Rs. 50,995 being derived in the shape of fees. The attendance at these schools amounts to 18,914 pupils, and each on an average educates 12 pupils and derives an income of Rs. 33—6—5 a year, or about 3$\frac{1}{3}$ annas per pupil per mensem.

23. The number of new books added to the Central Book Depôt during the year was 23,224, valued at Rs. 13,344. The value of stock, inclusive of that remaining from the previous year, was Rs. 60,784. 21,359 books, worth 7,348 Rupees, were supplied to Branch Depôts; and the total receipts from the sale of books amounted to Rs. 18,043, which is much the same as in 1872—73.

24. Two school houses of the second class standard design were in progress during the year, and one of them was almost completed.—Rs. 4,007 were spent in repairs. Building grants were made to the Wesleyan Mission of Rs. 1,000 towards the erection of the Market Boys' School at Mysore; and Rs. 350 towards that of the Pete Boys' School at Túmkúr.

25. Referring again to the Director's remarks on the means provided for the education of Europeans and Eurasians—a subject which is now attracting much attention from the public—it appears that the number of boys and girls of these classes in Mysore aggregate about 1,646 and 1,723 respectively. Of these numbers 421 boys and 308 girls belong to the European Military, and their education is provided for in the Regimental schools. There are thus 1,225 boys and 1,415 girls with whose instruction the Educational Department has to deal, and of these 1,029 boys and 1,233 girls reside in Bangalore. Allowing for children under six years of age, it is calculated that there are 2100 European and Eurasian children of both sexes of school-going age, and of these it is estimated that 1,400 attend school. Considering that a fair proportion of the total number are believed to be educated at home the residue of about 700 children, whose instruction is thus not accounted for, does not, in the Chief Commissioner's opinion, afford room for any startling conclusions as to the neglected condition of the European and Eurasian community at Bangalore. Sir Richard Meade believes that few Eurasian adults are unable to read and write, and it is clear that any illiteracy

which may exist among the class here is not due to supineness on the part of Government, inasmuch as there are in Bangalore alone 11 aided schools specially designed for the education of Europeans and Eurasians, of which four are schools of the higher class. Mr. Rice's remarks on the impolicy of attaching too much weight to race distinctions in schools are sensible and practical, and the Chief Commissioner has no doubt of the desirability of a thoroughly impartial fusion of Europeans, Eurasians and natives in all the schools attended by the three classes. The higher class schools in Bangalore, where Europeans, Eurasians and natives engage in the same athletic sports in friendly rivalry, shew that such a course is attended with little, if any, difficulty, and with good general results.

The Chief Commissioner believes that some movement in the direction of instructing and training Europeans and Eurasians in practical arts and industries might with advantage be made by Government. An association with the object of promoting this measure, among others designed for the improvement of the class in question, has recently been formed in Bangalore, and any scheme with this object which Mr. Rice, in co-operation with the society, may submit for consideration, shall receive due attention.

26. The acknowledgments of the Chief Commissioner are due to Mr. Rice, Director of Public Instruction, and to the other Officers engaged in the education of the youth of the Province, for their zealous services in this, one of the most important of the Public Departments. The Chief Commissioner has read with pleasure the Director's notice of the aid received by his Department from the Officers of the General Administration. From their position and from the intimacy which they acquire with the people by being so constantly in contact with them, these Officers ought to possess an amount of useful influence which, if duly exercised, should be of the utmost advantage to the Educational Department, and aid its operations and progress in a most important manner.

"By Order,"

H. WELLESLEY,

Offg. Secretary.

OFFICE OF THE DIRECTOR OF PUBLIC INSTRUCTION,
DATED BANGALORE, 15*th September* 1874.

From

LEWIS RICE, ESQ.,
Director of Public Instruction in Mysore.

To

H. WELLESLEY, ESQ.,
Offg. Secretary to the Chief Commissioner of Mysore.

SIR,

I have the honor to submit the Annual Report on Public Instruction in the Province of Mysore for the year ending 31st March 1874. Its bulk this year is diminished owing to the inspection and other reports, hitherto printed as appendices, being omitted, in accordance with the directions of the Government of India, in Resolution of the Home Department No. 11—436, dated the 24th December 1873.

Operations of the year.

2. Among the operations of the year the following subjects may be mentioned as having received special attention :—

Redistribution of inspection areas.

Improvement of the system of inspection.

Grading of all classes of school masters.

Assignment of the educational portion of the Local Fund Cess.

Inquiry into the means and quality of the education available for European and Eurasian children.

Review, in Committee appointed by Government, of all the School Books used in every description of school maintained or aided by the State.

Reorganization of the Central and Branch Book Depôts.

Regarding all these subjects information will be found under the appropriate heads.

3. The number of schools connected with the Department is now 774, of which 670 are Government schools and 104 aided. The total for last year was 757, composed of 659 and 98 respectively. Seventeen schools have therefore been added to the list, 11 Government and 6 aided. Taking into account 1,536, reported to be the number of un-aided schools, we obtain a grand total for the Province of 2,310 schools.

Number of Schools.

4. The complement of Hobli schools having been made up during the previous year, and no fresh sanction having been received, the means by which the number of schools has been so greatly increased during the past five years did not exist. Proposals, however, for enlarging the number were submitted, the carrying out of which will swell the statistics for the ensuing year. That the demand for more schools is real might be gathered from the slight increase in the reported number of private schools, but that the figures relating to them are liable to variation from other causes.

5. The number of pupils in Government schools stands at 20,145, against 19,497 last year; and in aided schools at 7,153, against 6,900. The total number 27,298 shews an increase of 901 over that of last year. Adding 18,914, the attendance in un-aided schools, we find 46,212 pupils to be under instruction in all schools.

Number of Pupils.

6. The long period during which the principal circle remained without an Inspector, and the unfortunate delay until near the close of the year of sanction to the budget which provided for additional teachers in many places, have undoubtedly retarded the progress and kept down the numbers in Government schools. But I may mention that the figures have also been reduced by some deductions for false returns not discovered in previous years. One master was found to have systematically returned the number of his pupils at treble the right figure.

7. The sum total of pupils consists of 43,592 boys and 2,620 girls, of whom 24,834 of the former and 2,464 of the latter are in Government and aided schools. According to creed 22,621 are

Classes of Pupils.

Hindus, 3,131 Muhammadans and 1,546 "others," chiefly Europeans and Eurasians.

8. The subjoined list shews the classification of the schools connected with Government, and the attendance at those of each grade :—

II. CONTROLLING AGENCIES.

9. *Direction.*—Mr. Garrett, who was on furlough, retired from the office of Director of Public Instruction in January. I officiated throughout the year, and Government has since been pleased to confirm me in the appointment.

10. *Inspection Staff.*—The staff of Inspecting Officers at the end of the year was as given in the margin. The strength of the two subordinate grades falls a good deal short of what was originally provided for Mysore. And considerations arising from the extended work of the Department, as well as from the educational demands present and prospective of the State, render it desirable that deficiencies should not be suffered to continue in this important branch of the executive.

2 Inspectors.
1 Deputy Inspector.
15 Sub-Deputy Inspectors.

11. *System of Inspection.*—The system of inspection hitherto pursued was based upon a circular drawn up by me in July 1867. A printed form of report was provided in which all the school studies were comprised under three heads; (1) Language, (2) Mathematics, (3) History and Geography. In Government schools every boy was to be examined in every subject, and in aided schools the same rule was to be observed as far as possible. The result of the examination in each subject in each class was to be entered in the tabular form in a single expression, as *very good, good, fair, bad,* or *very bad.*

12. *Changes.*—With the view of making the inspection more strict and ascertaining the results more exactly, the marking system was recently introduced, on the suggestion of Mr. Narayan Jagannath, who had used it in Bombay. It may be thus described. The three heads previously mentioned being retained, a maximum of 100 marks is allotted to each. A certain number of questions is put to each boy in every subject in which he is to be examined, and he receives marks accordingly as he may have answered correctly or otherwise the questions put to him. If the total number he thus obtains is one-fourth of that assigned for a sub-division of a head and one-third of the aggregate of that head, he is then considered to have *passed* in it. If he *passes* in all heads of the standard in which he is examined, he is said to have *fully passed* in that standard or class.

13. *Advantages.*—Besides the advantage of precision in the results, this system on the one hand prevents the promotion of boys to a higher grade who are not fully passed in a lower, while on the other it equally prevents those who have fully passed in any class from being kept in that class and presented again at successive inspections for examination in the same subjects. The latter is a device sometimes adopted by Head Masters. They devote all their attention for a time to a few boys, whom having brought up to a good standard, they keep as show boys for examination. The present system will exhibit at once, from the number of fully passed pupils in each grade, what the actual work done and progress made between the periods of inspection has been. It will also bring to notice the subjects in which the teaching has been defective.

14. *Inspectorship, First Circle.*—Mr. Hodson acted till the 1st of May, when he was ordered to Europe by the medical authorities. For

some time no successor was appointed, the office work being meanwhile attached to that of the Director. Rao Sahib Narayan Jagannath Vaidya, Deputy Educational Inspector in Sindh, was finally selected by the Government of India to officiate, and took charge on the 1st of September. But the change from the dry heat of Sindh proved trying to a constitution no longer young, and before Christmas Mr. Narayan Jagannath was laid up with severe fever. Although enjoying partial rest for some weeks at Bangalore, he grew worse, returned to Bombay, and died there on the 22nd of March. Mr Dunning, Principal of the Raja's School, has since carried on the work, the head-quarters of the circle being at Mysore.

Rao Sahib Narayan Jagannath Vaidya.

15. I take this opportunity of stating that Mr. Narayan Jagannath was energetic and skilful in the discharge of his duties. He labored under a disadvantage well nigh insuperable in not knowing Kanarese, the language of the country. But so far as thorough familiarity with his work could enable him to overcome this serious drawback he succeeded, and with the aid of Mahratti and Hindustani was able to exercise personal control to a certain extent over the operations of his Department. Government has lost in him an enlightened and sedulous Educational Officer.

16. *Inspectorship, Second Circle.*—Mr. Marsden continued to act throughout the year with much zeal and success. The establishment of the head-quarters at Shimoga has been of great advantage to the Nagar Division.

17. *Deputy Inspector, Head-Quarters Circle.*—On the arrangements described in last year's Report for the formation of a Head-Quarters Circle being carried out, a Deputy Inspector was appointed, from the 1st of August. Mr. Marsden who was nominated to the office being engaged in the Second Circle, Mr. Leonard from the High School was temporarily appointed and has rendered me active assistance.

18. *Sub-Deputy Inspectors.*—The number of Sub-Deputy Inspectors was increased by two, the new men being employed at present as Training Masters of Normal Schools according to the system hitherto adopted, which has proved of benefit to the Department. Some changes arose in

consequence of the dismissal of Vasudevaiya, Sub-Deputy Inspector of Túmkúr District. He was convicted, on the prosecution of Mr. Marsden, of receiving bribes, and sentenced to pay a fine of Rs. 500, or suffer imprisonment for three months. This unfortunate case is the first of the kind that has been discovered in the Department, and will, I trust, be the last. As a body the Sub-Deputy Inspectors have not discredited their responsible positions, but the utmost care is needed in appointing qualified and trustworthy men to the office. The list in the margin will shew that Shamachari was transferred from Kolar to Túmkúr District, Timmappa being appointed to the former. An exchange was ordered between Dakshina Murti Shastri of Bangalore District and Srinivasaiengar of Mysore District.

Name.	*Charge.*
Srinivasaiengar	... Bangalore District West.
Ramacharlu	... Bangalore-Kolar Junction.
Timmappa	... Kolar District North.
Shamachari	... Túmkúr District.
Dakshina Murti Shastri	... Mysore District West.
Anantachari	... Mysore-Hassan Junction.
Lakshmanaiengar	... Hassan District West.
Srinivas Tatachari	... Shimoga District.
Venkatramanaiya	... Kadur District.
Tirumalachari	... Chitaldroog District.
Khwaja Mahomed	... Hindustani Schools.
Venkatnarnaiya	... Training School, Shimoga.
Murti Rao	... Do Devanhalli.

III. GENERAL FINANCIAL STATISTICS.

Charges.

19. The expenditure for the year on the part of Government amounted to Rs. 2,43,372, which was apportioned according to the statement below. The cost of direction bore a ratio to the whole of 5·2 per cent, and that of inspection of 13·5 per cent. The additional expenditure from private sources in aided schools was Rs. 68,801 and in unaided Rs. 54,344, making up the grand total of Rs. 3,66,517 expended on education from both public and private funds.

Head.	Expenditure during 1873—74.	
	From State Funds.	From Local Funds.
Direction with its subsidiary charges ...	12,883	...
Inspection with its subsidiary charges ...	26,086	6,787
Instruction (including all educational expenditure not coming under the above heads). ...	1,48,604	49,012
Total.....	1,87,573	55,799

Receipts.

20. The receipts from all sources paid into Government treasuries amounted to Rs. 1,18,007, composed of school fees Rs. 13,261, proceeds of book sales Rs. 18,043, and educational share of local fund collections Rs. 86,703. The receipts in aided schools came up to Rs. 72,431, of which school fees contributed Rs. 22,102. The income of unaided schools is set down at Rs. 54,344, the fees having yielded Rs. 50,995. Adding these various items, we derive a total of Rs. 2,44,782 on account of the receipts in all the schools of every description throughout the Province, of which Rs. 86,358 or 35·2 per cent consisted of fees paid by the pupils.

Analysis of Expenditure.

21. An analysis of the expenditure on instruction in the various grades of Government and aided schools exhibits the following results :—

Description of Schools.	Government.		Aided.	
	From State Funds.	From Local Funds.	From State Funds.	From other Sources.
Boys' Schools.				
Higher	45,702	...	11,935	21,451
Middle	8,496	...	5,040	11,303
Lower	33,532	45,031	13,507	17,020
Girls' Schools.				
Higher	...	...	4,040	5,464
Middle	...	...	1,560	1,845
Lower	3,221	...	6,460	10,723
Normal Schools ...	1,938	55	...	...
Special „ ...	790	...	600	995
Total.....	93,679	45,086	43,142	68,801

The ratio which grants-in-aid bore to the whole Government expenditure for instruction was 17·7 per cent.

22. *Local Funds.*—The educational share of the Local Fund cess was less by Rs. 4,891, than in the previous year, owing to a falling off in the collections, and the income from this source is liable to fluctu-

ations. It has been decided to compensate for this by raising the proportion assigned to education from 24 per cent to a quarter.

IV. UNIVERSITY EXAMINATIONS.

Degrees.

23. A student of the London Mission Institution took the degree of Bachelor of Laws.

Branch Examinations.

24. The First Arts and Matriculation Examinations were held as usual at Bangalore, when 31 candidates appeared for the former and 155 for the latter. An application was forwarded to the Syndicate of the Madras University from a number of students in the city of Mysore, praying that the privilege might be restored of holding branch examinations there. But the University authorities saw no reason for altering the decision already arrived at in the case.

First Examination in Arts.

25. The number of candidates sent up from schools in this Province for the First Examination in Arts was 19, of whom 10 passed, one being placed in the first class. The following list supplies details. Of the ten, 9 were Hindus and the other a Muhammadan. The First Arts class in the Shimoga District School, I may remark, has not been continued, as the existing staff of masters would not admit of it. The class in the Native Educational Institution has also been given up.

Total.....	19	1	9	10

26. The single candidate in the first class, Y. Srinivas Rao, stood 5th on the list, and thus became entitled to one of the scholarships offered by the Madras Government to those who succeed in attaining a certain rank in the order of merit. Such cases have occurred before, but the claims of students from Mysore are not admitted, on the ground that this Province is a foreign territory. It may be mentioned as very creditable to this young man that he took a similarly high position on matriculating two years ago, and would then, but for the same objection, have become the holder of a scholarship. Of the second class candidates, one from Shimoga headed the list, and one from Mysore was 4th.

Matriculation Examination.

27. For the Entrance examination 137 candidates came up from schools connected with this department, of whom 43 were successful, namely, 5 in the first class and 38 in the second, according to the particulars given below. Two of the number were Native Christians, 33 (including 2 Coorgs) were Hindus and 13 Europeans.

Total.....	137	5	38	43

Of two others who passed, one was partly educated at the Raja's School and the other at Bishop Cotton's.

28. The highest in the first class was a student of Bishop Cotton's, who took the 8th place, and thus qualified for a scholarship had he not belonged to Mysore. The highest in the second class came from the Wesleyan Mission School, Mysore, and stood 6th.

Changes made by the University.

29. It was proposed by the Syndicate of the University to require of candidates for the First Examination in Arts, a certificate of having attended for two years subsequent to their Matriculation at one or other of certain selected Institutions, which alone were recognized as competent to grant such certificates. The object of the measure was to obtain some security on the part of candidates that they had passed through a regular course of discipline and study. Had the proposal become law, the High School, Raja's School and Bishop Cotton's had been chosen by the University authorities for Mysore. But the restrictions thus imposed upon candidates would doubtless have created a monopoly in many ways inconvenient, and the question has, perhaps wisely, been placed in abeyance.

In subjects of Examination.

30. A series of more important changes have since been initiated and obtained sanction. These relate to the courses of study and subjects of examination for the University tests. For Matriculation, Physical Geography and Physics have been substituted for English History; while of the two papers generally set on each Language brought up, one paper only is to be composed of questions on the appointed text books, the other being of a general character relating to the grammar, structure and idiom of the language, and requiring further in the case of English, paraphrase of passages from books not previously specified, and in the case of the vernacular, reciprocal translation and original composition. In the First Arts Examination, European History is to take the place of Indian History, and Human Physiology that of Logic; while in the Language papers changes will be introduced similar to those for the Matriculation. For the B. A. examination. Chemical Physics and Botany are substituted for Physical Geography, Physics and Human and Comparative Physiology, under the head Physical Science, as one of the optional subjects. In Language, reciprocal translations and original composition are to be required.

31. A modification is also to be made in determining the results. In the First Arts and B. A. examinations a candidate who fails to obtain one fourth of the marks in one or more subjects, except the English language, is nevertheless to be allowed to pass if he secures one third of the aggregate number of marks after deducting the marks gained by him on the subject or subjects in which he has failed.

In system of marking

32. The tendency of these changes is towards remedying some of the defects which have been pointed out in the University courses of study. It is doubtful however whether they go far enough. The Physics introduced into the Matriculation examination, for instance, is so very elementary as to be included in a portion only of the little shilling book appointed as the text. In the important subject of Language, again, the value of the paper of general questions is detracted from by not making it the essential one for a pass. The modifications however are such as incline to meet the wants of the day, though they fall short of what might be proposed.

Tendency.

V. GOVERNMENT SCHOOLS.

33. The following table exhibits in the prescribed form the statistics of all the Government schools in Mysore :—

Description of Institutions.	Number of Institutions.	Number on the Rolls (monthly average.)	Average Daily Attendance.	Total Expenditure.		Fees and Book Sales returned to Government.
				From Provincial Funds.	From Local Funds.	
Boys' Schools.

Special Schools ...	7	736	734	790	...	164
Total.....	670	19,321	15,439	93,679	45,086	31,304

A. Schools of the Higher Class.

High School, Bangalore.

34. The High School has during the year been in charge of Mr. Pope, officiating as Principal, with Mr. King, late Head Master of the Civil Orphan Asylum at Madras, as First Assistant for most of the time. The statistics of attendance and results of the University examinations shew that the school has been conducted with credit.

Statistics.

35. It contains 566 pupils, with an average daily attendance of 523, against 542 last year, with an average daily attendance of 437. But although the daily attendance has been higher, the fees have been less productive, the amount collected for the year being only Rs. 4,740—12—0, against Rs. 5,051—14—0 last year. Owing however to the principal masters being on acting allowances, the total cost of educating each pupil has been Rs. 28—15—4 this year, against Rs. 32—3—11 last, and the cost to Government Rs. 20—1—3, against Rs. 2[illegible]—14—3. The number of Muhammadan pupils has doubled, being now 21, but the number of "Others," or Europeans and Eurasians, has fallen from 45 to 12, most of the boys, it is believed, having joined Bishop Cotton's. The transfer is not perhaps a matter for regret, as such boys are likely in certain respects to receive a more suitable training in a school specially designed for their instruction than in one where natives very largely preponderate.

College Classes.

Senior B. A. Class	...	6
Junior " "	...	5
Senior F. A. "	...	21
Junior " "	...	14

36. The regular college classes contain 46 students, as per particulars in the margin, who are undergraduates of the Madras University. The class of candidates for Matriculation numbers 46 pupils, and the preparatory Matriculation class 38. It is reported that, as the time for the University examinations approaches, the students gradually drop off in attendance, and stay at home to "cram." It is therefore gratifying to state that none of those who resorted to this objectionable practice succeeded in passing.

School Classes.

37. The upper school classes underwent an annual examination by means of papers set by various gentlemen connected with education, to whom the thanks of this Department are due for their obliging assistance. The results

have not been received in this office. The lower school classes were examined by the senior masters.

Sports.

38. Athletics continue to receive due attention. The United School Sports were held for the second time in the High School grounds and attracted competitors from all the principal institutions here. It is proposed henceforward to give a challenge cup, which will become the property of any school whose students win it for three years running.

Raja's School, Mysore.

39. The Raja's School continued under the charge of Mr. Dunning. The number of pupils on the roll at the close of the year was in all departments, 509,* as against 369 last year. The increase is confined to the English and Kanarese branches, and took place near the end of the official year, in January and February. The average daily attendance for the twelve months is therefore not proportionately high. Apart from this, the percentage of absentees, especially in the Hindustani branch, is greater than it ought to be. Sanction to the propositions for increasing the teaching staff was not received till the end of the year. Had it come sooner it is likely that the attendance throughout the school would have been higher.

*English	...	272
Kanarese	...	169
Hindustani	...	68

Cost.

40. The fees produced Rs. 2,110—2—0, against Rs. 2,036—0—0, last year. The cost of educating each pupil in the English school was Rs. 42—7—5, of which the State bore Rs. 33—9—8. The corresponding figures for last year were Rs. 44—15—3 and Rs. 36—6—5.

Distribution of Pupils.

41. There are 26 students in the college department, namely, 6 studying for the B. A. and 20 for the F. A. examinations. In the Matriculation class there are 35. The classes below this were carefully examined by Mr. Dunning, for the purpose of making promotions. Although no pupils were sent up to a higher class who did not obtain at least one-third of the aggregate number of marks in each subject, there were but very few boys left in each class, an evidence that masters and boys had done their work satisfactorily.

42. *District Schools.*—The results of the Entrance examination already given shew that Shimoga took a very decided lead among these schools as regards the number of successful candidates. It is the natural wish of Mr. Taylor, the Head Master, that a higher range of study should be provided for. An address on the subject was also delivered to me by some native gentlemen on the occasion of my visit to Shimoga in January. But the expediency of making such arrangements at present seems doubtful, and my advice that matriculated students should come to Bangalore and enter the collegiate classes of the High School has been in one or two cases adopted.

School.	Pupils.	Masters.
Shimoga ...	227	7
Hassan ...	180	8
Chitaldroog ...	144	6
Túmkúr ...	102	5
Kolar ...	97	5

43. The inspection of the Hassan School yielded results very creditable to the Head Master, Mr. Haldwell, and his Assistants, the percentage of fully passed pupils being as high as 76 for the first class and 70 for the second. Of the remaining schools the one at Chitaldroog, under the mastership of Mr. Clapham, made satisfactory progress. At the close of the year an opportunity presented itself for making changes among the masters of these three schools which will, I expect, lead to a great improvement in the condition of each. Mr. Clapham goes to Túmkúr, Mr. Coleman from the Book Depôt to Chitaldroog, and Mr. Birch to Kolar.

B. Schools of the Middle Class.

44. *Taluk Anglo-Vernacular Schools*.—Of these schools educating up to a standard below Matriculation, Chikballapur School has for some time taken the lead, for which the credit is due to Venkatapataiengar, the Head Master. He will be put in charge of the unsatisfactory school at Chikmagalur, the head-quarters of the Kadur District, for the purpose of raising that institution to the standard of a higher class school. The Gundlupet School, though a small one, is entitled to favorable mention, and in some respects Húnsúr School has done well.

C. Schools of the Lower Class.

1. *Taluk Schools.*

45. *Kanarese Schools*.—The whole number of Taluk Kanarese Schools is 81, with 4,308 pupils on the rolls. They are distributed as shewn in the margin of the next page. The most numerously attended is the Kanarese branch of the Raja's School at Mysoré, which contains 169 pupils. In the Bangalore District, there are 140 in the Dodballapur

District.	Schools.	Pupils.
Bangalore ...	11	684

Hassan ...	10	366
Shimoga ...	10	673
Kadur ...	8	382
Chitaldroog ...	10	523
Total.....	81	4,308

School. In Kolar District, 110 at Sidlagatta. In Túmkúr District, 116 at Túmkúr. In Shimoga District, 104, all Lingayats, at Nyamti. These are the largest and among the most successful schools. Hole Narsipur in Hassan District ought to have had a place among them, but has latterly fallen into a much lower condition.

46. Very satisfactory schools, though with a less attendance than those above mentioned, are Kankanhalli, Nelamangala and Yelahanka in Bangalore District; Goribidnur in Kolar District; Koratagere in Túmkúr District; Malvalli, Chamrajnagar and Seringapatam in Mysore District; Hole Honnur in Shimoga District; Sakrepatna in Kadur District; and Hosdurga in Chitaldroog District.

47. Commendation may be bestowed on the schools at Sarjapur in Bangalore District, Mulbagal and Narsapur in Kolar District, Yedatore and Mandya in Mysore District, Belur and Attikuppa in Hassan District, Ságar, Sorab and Shikarpur in Shimoga District, and Yedahalli in Kadur District.

48. The pupils are divided into four classes. By tabulating the schools according to this gradation we find that 12 have attained the first or highest grade, that 46 have reached the second grade, and that the remainder have not risen beyond the third. The particulars in the margin shew the results for each District. The Mysore and Bangalore schools are evidently the most advanced. Those in Kadur and Chitaldroog are backward. Kolar and Hassan schools are a little better, but should have reached a higher standard. The Shimoga and Túmkúr schools rank second.

District.	Schools of each Grade.		
	I	II	III
Bangalore ...	3	6	2
Kolar ...	...	6	5
Túmkúr ...	1	6	2
Mysore ...	6	6	...
Hassan ...	...	7	3
Shimoga ...	2	8	...
Kadur ...	...	3	5
Chitaldroog ...	...	4	6
Total.....	12	46	23

49. On comparing this table with the one given in para 45, it will be found that, with the exception of Chitaldroog, the Districts fall into the

same order when placed according to total attendance at the taluk schools as they do when placed according to the standard attained by the schools. The intimate connection between the standard of instruction and the rate of attendance is thus apparent. The one reacts upon the other. The more successfully a school is taught the more popular it becomes. To increase the efficiency of the schools should be therefore the aim of both Inspectors and Masters. Pupils will then soon flock in. But to get together a large number of boys without attention to elevating the character of the instruction given is not likely to result in permanent improvement of the attendance.

50. But the want of suitable premises is a great drawback to the due expansion of these schools. I regret that of eight buildings recommended for erection in the ensuing year, only one has been sanctioned.

51. *Telugu Schools.*—The Telugu branch schools, to the number of 6, containing 238 pupils, are all in the Kolar District, where the Telugu language prevails. They form an important element in the education of that part of the country. Two of the schools are of the second grade, three of the third, and the remaining one of the fourth. The Mulbagal school is reported as being the best.

52. *Hindustani Schools.*—The Hindustani schools have been increased to 17, distributed as described in the margin, and have an attendance of 777 pupils. Five of the schools have reached the second grade and six others the third. The Kolar and Chikballapur schools may be described as the most uniformly successful. The Mysore School, a branch of the Raja's School, is a high class institution, but the attendance is unfortunately very irregular. Of the new schools established during the year under trained students of the Normal School, the one at Chikmagalur has made a most promising commencement, and is a great contrast to the unfortunate English and Kanarese schools at that station. The Sira and Shimoga Schools have also begun well. The Belur master, I regret to say, died from the effects of the climate. He had grown up as a pupil in the Kolar Hindustani School and was an amiable and promis-

ing young man. The Maddur master has had to resign on account of sickness. He did good work formerly at Mysore as an assistant. The old established school at Chitaldroog is far from satisfactory. The Túmkúr School has made considerable improvement. Mulbagal and Húnsúr schools are in a fair state of progress.

2. *Hobli Schools.*

53. The number of Hobli or Village schools stands at 534, with 11,983 pupils. The attendance shews a small increase on that for the preceding year, and owing to the drawbacks described in last year's report, greater improvement in this respect could not be looked for. Arrangements having since been made for the periodical promotion of the masters, and for the provision of assistance where the need for it existed, the ensuing year's statistics will doubtless shew a good advance in the number under instruction.

54. The foregoing figures give an average of about 23 pupils to each school. But this is far from representing the attendance at the most popular institutions. For instance, at Tyamgondal there are 105, at Holalkere 92, at Vastara 74, at Kalale 64, at Melkote 67, at Ganjuru and at Kumsi 56, at Bidadi and at Hagalvadi 55, at Nonavinkere 52 and so on.

55. Apportioning the schools to their several Districts, we obtain the results given in the margin. An analysis of the total number of pupils shews that 11,386 are Hindus, 570 Muhammadans and 27 'others.' All learn Kanarese with the exception of 173 in Kolar District who learn Telugu. The Muhammadan pupils thus bear to the whole number a ratio of more than 5 per cent, which is rather higher than the ratio of Muhammadans to the aggregate population of the Province. This is an interesting fact to note, as the Muhammadans in more advanced schools form but an insignificant fraction. As regards the classes of pupils described as 'others,' there is too much reason to fear that out-castes are practically excluded from the schools by the operation of social prejudice. The question is receiving attention, but requires delicate handling.

56. The quantitative progress of the schools thus appears to be quite equal to the expectations that might have been formed taking all the circumstances into consideration. The qualitative progress is indicated by the following results; 17 schools have a first class, 204 have a second, 261 a third: the rest are below the third grade. The Inspectors reports class 16 as very good, 161 as good, 228 as fair: the rest are not satisfactory. Four-fifths of the schools are thus doing generally well, more than one-third of the whole number being described as good or very good. Much doubtless remains to be done in the way of improvement, and every effort is being made, by raising the character of the inspecting staff more particularly charged with the oversight of the schools, to ensure a steady and wide spread progress.

57. Applications for fresh schools are being continually received, which is a sufficient testimony to their popularity. Sanction was obtained towards the close of the year for the establishment of 200, additional masters for which are now under training. To prevent the setting up of schools in places where the interest in education is transient and the number of pupils likely to be low, the villagers applying for a school are now required to furnish a list of all intending pupils, giving age and other information, and also bearing the signature opposite each child's name of the parent or guardian in token of an undertaking to send him

to the school. Specific provision of premises for the school is also required. These regulations have had a wholesome effect in checking applications made on insufficient grounds by a small and sanguine knot of villagers, who, as is often the case, unhesitatingly promise an attendance of 40, 50, or even 100 pupils. When the details are reduced to writing as above described, we have probably as secure a guarantee as under the circumstances can be obtained against the break down of schools owing to a sufficient number of pupils not being forthcoming, or to want of general sympathy with the movement on the part of the villagers. The same course has also been prescribed in the case of transferring existing Hobli schools from one village toanother, and has, in such cases, equally acted as a deterrent against the removal of schools on trifling grounds or to accomplish some private end.

D. Female Schools.

58. The Girls' schools number 9, with an attendance of 252 pupils. Their location is almost confined to the Bangalore and Kolar Districts, as will be seen by reference to the statement in the margin. Hindus number 249, Muhammadans only 3 : 213 girls learn Kanarese, and 39 Telugu.

District.	Schools.	Pupils.
Bangalore ...	4	122
Kolar ...	4	104
Hassan ...	1	26

59. No marked progress was made in any of these schools. But the elder girls are reported to have done well in several cases, though the younger ones, infants in reality, do not seem to have received in every place a due share of the master's attention. These schools are exotic institutions and labor under some disadvantages arising from the entire want of female teachers. There is little prospect under oriental customs of such a class being formed. The most successful female instruction must therefore be looked for in Mission schools which are under the superintendence of European ladies. At the same time, it may reasonably be hoped that the Government girls' schools are not destitute of benefit to the communities among which they are placed. The Chintamani School has done good work of its kind and enjoys much popularity. The schools at Sarjapur and Sidlagatta, as well as the one at Bangalore, deserve favorable mention. The Chikballapur School is particularly well reported of.

60. Applications for new schools have been received from Kankanhalli, Gudibanda and other places.

E. Normal Schools.

61. The only Normal School in operation throughout the year was the Hindustani Normal School at Bangalore. The average number of students was 13. At an examination held in February, eight of the men gained over one-third of the marks. An elementary knowledge of Kanarese was made a *sine quâ non* for passing, which, though a distasteful condition, is one that cannot be dispensed with in the interests of the schools which the masters trained in this institution will eventually have charge of. Five of the students who obtained certificates of qualification as teachers were provided with employment and promise well. The schools established in the preceding year under trained masters from this Normal School are, without exception, very popular and successful.

Hindustani Normal School.

62. Pending the receipt of sanction from the Government of India to an extension of the Village school system, no fresh Training Schools for the preparation of Hobli school masters were opened. At the close of the year, however, arrangements were made for establishing one at Shimoga for the Nagar Division, and one at Devanhalli for the Nundydroog Division.

Training Schools for Hobli Masters.

63. The number of applications received for admission to these institutions was in strange contrast with the experience of five years ago, when the movement was first set on foot, while at the same time additional testimony, were it needed, is thereby furnished in proof of the popularity of the Hobli schools. In 1869, 30 professing indigenous school masters were with every effort induced to come forward at Kolar, and offer themselves as candidates for training. In 1874, when the Training school was to be opened at Devanhalli, the applicants exceeded 600 in number. No little tact and skill were required to make a selection of about one in ten from this crowd and to pacify and dismiss the rest, but the latter process was opportunely aided by the continuous rain which accompanied the cyclone. In the Nagar Division, again, there was not a single candidate for admission at Shimoga in 1869 when I arrived there for the purpose of establishing the Training school. This year at the same place there were 35 applicants in waiting.

F. Other Schools for Special Education.

64. The Engineering Class attached to the High School was conducted for several months by Mr. Conquest, B.A. But in October he resigned in order to enter the Controller's Office, Public Works Department. No competent person for the mastership could subsequently be obtained for the small pay allowed. One of the senior pupils has therefore been carrying on the exercises of the class, pending new arrangements of a more satisfactory character which are contemplated.

Engineering Class, Bangalore.

65. Of three students who last year passed the Surveyor's Test, one has obtained employment as a third class Surveyor in the Madras Revenue Survey, another is in my Office, and the third is in charge of the class. Another student has after examination been made a Sub-Overseer in the Mysore Public Works Department. None of these was a native, but three natives hold scholarships.

Jail Schools.

66. Instruction is regularly given now to the convicts in the Central Jail at Bangalore, and in the Jails at Mysore and Shimoga. The

Jail at—	Convicts under instruction.
Bangalore ...	392
Mysore ...	207
Shimoga ...	120

number thus brought into contact with the means of mental improvement was 721, of whom 652 were Hindus and 69 Muhammadans. They were distributed according to the statement in the margin.

67. *Central Jail, Bangalore.*—For the following interesting particulars regarding the teaching in the Central Jail, I am indebted to Dr. Henderson, the Superintendent. "Education in the Central Jail is pursued in three distinct schools, namely, for the male, female, and juvenile convicts, with the common object of imparting some elementary instruction to those who are dealt with in them.

68. "The juveniles have their lessons in the day time, but for the rest this forms the employment of all who have no other demands upon their time during the last part of every day for half an hour. The attendance is compulsory, but progress is optional, although outward attention is demanded from all, and certain disadvantages come to the man who has made no advance whatever. To those who have not experienced it, it is inconceivable how long a time a man may sit before a board having the letters of the alphabet on it, without making their acquaintance further than perhaps to repeat them by rote, or how very slowly it dawns upon him that 2 and 2 always make 4. If any one deems this latter proposition a self evident truth, he may here be convinced to the contrary. It seems as though the faculty for acquiring this kind of knowledge having been dormant since infancy or never having been roused, is so weak as to be unable to retain anything."

Men.

69. "On the other hand among those who are not too old, or who have had some slight instruction previously, or who really give their minds to it, things go on much more briskly and satisfactorily, and very fair progress is made. Of those released during the year, 46 had learned to read, write and count in the Jail. The schools and classes are arranged and conducted as before, and the average number under tuition during the year has been 412, of which about 20 are taught English for Press employ, and the rest are in Kanarese.

70. "Among the females the progress is but slow, but it really requires a very long time before they can be brought even into the attitude for learning anything. It seems to be much more strange to them than to men, which perhaps may be set down to an acquired and inherited habit of mind, women having for generations been in this respect neglected. It will be something if here we even help to remove this. It is difficult also to present instruction to them in practical form. If perhaps their proverbial curiosity was aroused to know what was inside the books, some brisker progress might be looked for.

Women.

71. "Among the juveniles some more real work in education can be done, although during the past year they have been few in number and the most of them have been naturally dull. Two who were released during the year were remarkable exceptions, and had learnt to read and write well, besides having had set going within them an aptitude for acquiring more.

Boys.

72. "It would of course be interesting to know whether any practical good effect is produced by all these educational measures among the convicts, but this cannot well be known. The only thing which must be certain of it is, that it helps to remove ignorance, which is in itself an evil almost as great as crime, and to awaken within a man a notion that he has faculties above the beast, if he will only take the trouble to use them."

VI. PRIVATE INSTITUTIONS UNDER GOVERNMENT INSPECTION.

73. The following statistics exhibit the number and description of schools receiving grants-in-aid from the State:—

Class of Schools.	Number of Institutions.	Number of Pupils on the Rolls, Monthly Average.	Average Daily Attendance.	Grants-in-aid given by Government.	Expenditure from all sources other than grants-in-aid given by Government.	Fees.

Hassan	5	132	1	25
Shimoga	4	166	1	68
Kadur	...	...	...	...
Chitaldroog ...	1	34	1	41

78. This seems the most appropriate place in which, as directed by the Government of India, to notice the important question of the means and quality of the education available in Mysore for children of European and Eurasian parents, upon which a separate report was submitted some months ago. The inquiry arose in connection with the investigations made by Mr. Lawrence, deputed for the purpose by the Government of India. Mr. Lawrence paid a hurried visit to Bangalore, which unfortunately he was unable to prolong, owing to other arrangements made without knowing the number and importance of the schools for such classes at this station.

Education of European and Eurasian Children.

79. The specific heads under which the Government of India called for information, additional to that which had been collected by Mr. Lawrence, were (1) the European and Eurasian population, especially in large towns, for whom schools are required, and (2) the best means of supplementing the existing provision where it is found by inquiry so conducted to be inadequate in quantity or unsuitable in quality. The following direction among others was added for guidance. "The need of such schools must be judged by the population and not by the apparent demand or desire for them, for at all times and in all countries the offer of education to the poorer classes has preceded the demand."

80. By the census of November 1871, there were found to be 4,469 Europeans and 2,921 Eurasians in the Province, of whom no less than 4,096 of the former and 2,411 of the latter reside in Bangalore, in the Cantonment. The distribution throughout the Districts is as given in the margin.

District.	Europeans.	Eurasians.
Bangalore ...	4,114	2,445
Kolar ...	14	31
Túmkúr ...	48	67
Mysore ...	110	196
Hassan ...	78	64
Shimoga ...	34	35
Kadur ...	56	47
Chitaldroog ...	15	36

81. The sex and creed of the two classes are as stated below :—

	Protestants.		Roman Catholics		Not stated.		Total.	
	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.
Europeans...	2,352	1,180	616	299	16	6	2,984	1,485
Eurasians ...	859	1,089	439	498	23	13	1,321	1,600
Total.....	3,211	2,269	1,055	797	39	19	4,305	3,085

Separating adults from children we obtain the following figures :—

	Men.	Women.	Boys.	Girls.
Europeans... ...	2,145	672	839	813
Eurasians	514	690	807	910
	2,659	1,362	1,646	1,723

82. Of the above, 421 boys and 308 girls belong to the European Military, whose education is provided for in the three Regimental Schools at Bangalore, leaving 1,225 boys and 1,415 girls with whom the Educational Department is directly concerned. Of this number 1,029 boys and 1,233 girls, as per particulars in margin, are in Bangalore. Allowing for those under six years of age, it is calculated that in round numbers there may be, omitting the European Military, 2,100 European and Eurasian children in the Province of an age to attend school.

	Boys.	Girls.
Europeans ...	351	452
Eurasians ...	678	781

83. Statistics of the number actually under instruction are not obtainable from the Census Returns, as natives are included with Europeans under the head Christians. And owing to much private instruction by means of tutors and governesses at home, and in private schools, the returns of institutions connected with this Department do not afford full information on the subject. But there appear to be not less than 1,400 European and Eurasian children under public instruction alone. This allows for those studying along with natives in Government and Mission Schools, as in the High School, &c.

84. The public means of education specially designed for these classes consist, not reckoning branches, of 12 different institutions, all but one of which are situated at Bangalore, the other being at Mysore. The following is a table of these schools, shewing attendance and other particulars :—

No.	Name.	Where situated.	When established.	Denomination.	Under what management.

as an allowance for Military orphans.
as an allowance for Military orphans.
extend over the year.
of destitute children, not orphans.
educating each pupil.

85. As all the educational institutions, Government and aided, are capable of receiving more pupils without materially adding to their present expenditure, the estimates above made do not represent the maximum number for whom provision exists. It is therefore perhaps not too much to say that 1,600 or 1,700 European and Eurasian children could find means of instruction in existing schools. These considerations and independent inquiries have led me to the conclusion that additional schools for these classes are scarcely needed here.

86. The standard of instruction in the existing schools may be roughly gathered from the classification in the foregoing list. But except for the higher class this is in a measure arbitrary, and perhaps apt to mislead from the tendency to connect the terms *middle* and *lower* class with social as well as educational gradations. To take for instance the case of Saint John's Schools, the first in the list of middle class schools. These consist of three separate branches, for boys, girls and infants, each occupying separate premises. The education imparted therefore ranges from somewhat below University Entrance standard to the merest rudiments. In social position again the pupils include not only children of comparatively well-to-do parents in humble life, but are drawn from even the ranks of destitution, for a large number are daily provided with a meal. The Roman Catholic schools in the same way receive the utterly destitute, especially orphans, boarding and clothing as well as educating them. It is likewise proposed to admit destitute children to the Protestant Cantonment Orphanage as day scholars. These explanations will serve to shew that the wants of even the lowest grade are somewhat more liberally provided for than would at first sight appear.

87. As Eurasian children are those for whom Government is in particular solicitous that due means of education should be available, I may remark that no difference is made between European and Eurasian children in any of the schools aided by this Government. Boys and girls of both classes are freely admitted either as boarders or day scholars on precisely the same terms and footing. This is equally the case in the Government and Mission schools for natives. Eurasian parents have therefore a choice of every description of school in the Province, from a Government day school in the District with a monthly fee of 4 annas, or certain of the aided schools in Bangalore where

education is free in deserving cases, to the most expensive institutions at the head of the list.

88. As regards the quality of the instruction there is undoubtedly a tendency in many of the schools to put as great a distance between Europeans and natives as possible. Hence the cultivation of Latin by boys and of French by girls to the almost entire exclusion of the vernaculars and to much neglect of even English. The observation in the Resolution of Government that the European and Eurasian pupils rarely learn to read, write, or speak the vernaculars of their own Province grammatically, accords with my own experience. Those who from circumstances have been brought up entirely among natives acquire, it is to be feared, a volubility in slang, or worse, rather than a command or use of the language such as a native gentleman has. The neglect of the vernaculars is one of the most patent defects in the education of the schools for European and Eurasian children.

89. Another is the want of attention to practical and industrial training. The design of the highest schools may be very well expressed in Dr. Pope's words as regards Bishop Cotton's, namely "to give such a training as will enable boys to pass the Madras University tests at the cheapest rate." Whatever may be thought of the scope of an education of which this is the highest aim, approximation to it as near as possible is the end in view even in the middle class schools. There is a plain want of adaptation in the system to the requirements alike of the public service and of the private life which the class of children now under consideration will in nine cases out of ten be called to enter upon. It may well be doubted whether most of the boys turned out from these schools have any knowledge of the composition and use of building materials, of the parts or operations of machinery, of the methods of levelling, surveying or estimating, of the arts of carpentry or joinery, of architectural drawing and designing, of the elements of botany, natural history or chemistry; and whether the girls could cut out and make up the clothes of a household, or cook its meals, or cast up the daily accounts and make mental calculations with ease. A variety of subjects of great practical importance might be indicated which all the pupils of the schools now in question will probably, if not certainly, have more or less to deal with, or by which they could make a respectable living, but for

which they receive no preparation. The Friend-in-need Society is now forced to establish a workshop, the necessity for which, and even for such a society at all, would perhaps be in some measure done away with were Eurasian boys as a rule trained in industrial callings and thrifty habits.

A. Aided Schools of the Higher Class.

90. *English.*—These schools were inspected in November. *Bishop Cotton's* contained 125 pupils, 123 present, of whom 31 were boarders. Dr. Pope taught the College and Matriculation forms, (the elder girls from the girls' school being associated with the boys,) and five assistant masters, two of them graduates of Madras, had charge of the remaining forms. The general results of the inspection were satisfactory, but the lower Matriculation form was not as well prepared as some of the others. A good deal of time is devoted in this school to Latin, in the pronunciation of which the continental system, now advocated in England, is adopted. It did not, however, appear to me consistently pursued. At *Saint Andrew's* there were 72 pupils, with actual attendance of 65. The number of boarders was 20. Mr. Thomson was at the head, with four assistants, one of them a Madras graduate. The English studies in all classes appeared wanting in critical accuracy. In most other respects the examination yielded fair results.

Bishop Cotton's School.
Saint Andrew's School.

91. The entire absence of practical instruction in both these institutions, and the exclusive attention paid to a classical course of study, are matters in which reform is called for. "One large boys' school where Bishop Cotton's now stands, and a girls' in Saint Andrew's Church compound," which Mr. Lawrence hints as a mode of amalgamating the two that would utilize both buildings, is, and perhaps will never cease to be, impracticable. But his recommendation that both should be placed more *en rapport* with the Educational Department is one that would certainly lead to their working in more completely into the general system of public instruction.

92. *Anglo-Vernacular.*—The number of pupils in the *Native Educational Institution* at the time of inspection was 298, 262 being present. Except 2 Muham-

Native Educational Institution.
London Mission Institution.
Wesleyan School, Mysore.

madans and 5 Christians, all are Hindus. During the year a special Tamil Department had been formed, containing 41 of the pupils, divided into three classes. The Rev. Mr. Hudson, B. A. is assisted by one European and 9 native masters. The classes on the whole exhibited a fair amount of progress, but the second was reported of unfavorably in most subjects and seemed to contain a good many drones. The youngest boys in the school did well. The *London Mission Institution*, under the Rev. Mr. Walton and 8 assistants, contained 172 pupils, of whom 145 were present. The progress made in the study of English was considered to fall below what might have been expected. In the mathematical and other subjects the results were more favorable. I regret that Mr. Walton has taken exception to the inspection report, stating that "though the school is in a much more efficient state than it has been in any year previous, yet the report is far more unfavorable that it has ever been before." The *Wesleyan School, Mysore*, has been in charge of the Rev. Mr. Riddett, assisted by 8 masters. The roll shewed 180 pupils, with an average daily attendance of 154. The Inspector represents it as being in a satisfactory condition and doing good work.

B. Aided Schools of the Middle Class.

93. *English.*—Placed at two opposite ends of Bangalore, these schools are providing suitable instruction for numbers of poor children living in the immediate neighbourhood of each, who would otherwise grow up in ignorance with all its attendant evils. While the *Saint John's Schools* fully maintain their long standing reputation, the *Ordnance School* has made very marked progress under recent new arrangements, and is now placed on a sound and useful footing. More attention to the map in the former, and the introduction of a better style of reading books in the latter are recommended.

Saint John's Schools.
Ordnance School.

94. *Anglo-Vernacular.*—The Roman Catholic Seminaries are all well reported of, especially *Saint Joseph's*, under the charge of the Rev. Mr. Clemot, M. A. This school now trains students for Matriculation. There were 126 pupils at the time of inspection, 53 of whom were boarders. Among these are included 8 military orphans receiving an allowance from the Madras Government, and 14 others, fed, clothed and instructed gratuitously. Of the *London Mission Schools* the branch at Alsur is deserving of commendation. The Cantonment School had not made such decided progress as the other.

Saint Patrick's „
Cantonment School.
Alsur „

95. The notice of the Middle Class aided schools may be fitly closed with the following well deserved encomium of Mr. Lawrence upon those for European and Eurasian children. "Of the Roman Catholic institutions and the Saint John's District Schools" he writes, "I desire to speak with the greatest praise. All the arrangements in the latter are admirable. They are economically conducted and they are in the midst of a large sphere of usefulness. I was much pleased with all I saw at Saint John's District Schools." I would add that they are greatly indebted to the genial control of the Rev. Gilbert Cooper.

C. Aided Schools of the Lower Class.

96. *English.*—The *Orphanage* is now provided with a handsome and commodious range of buildings, with accommodation for more than 100. It is proposed to extend its operations by receiving as day scholars destitute children who are not orphans. To this end an increased grant has been applied for. At the time of inspection there were 22 boys and 29 girls. They passed a satisfactory examination. Eight boys and one girl obtained employment during the year, the latter as a servant maid and the former as compositors in local printing offices. Four of the boys and the girl are no longer connected with the school, but the four other lads still board and lodge at the Orphanage, their earnings amounting to Rs. 8 a month going into the general fund. All the household work on the premises is done by the children. The *Ragged School* is a day school, intended principally for children of drummers in Native Regiments. It contains 26 boys and 22 girls. They are reported as not reading well. The writing was better.

Cantonment Orphanage.
Saint Mark's Ragged School.

97. *Anglo-Vernacular.*—Under this head there are four schools, two in Bangalore, one in Mysore, and one in Túmkúr. In the Catholic Schools may be found a few very poor Eurasian children. The

Blackpalli Catholic Schools.
Catholic Schools, Mysore.
Saint Paul's Schools, Bangalore.
Wesleyan Orphanage, Túmkúr.

Blackpalli and *Túmkúr* Schools are well reported of. The others, especially *Saint Paul's*, were not satisfactory.

98. *Kanarese.*—There are 15 Kanarese schools aided by Government, of which 12 belong to the Wesleyan Mission, mostly situated in Túmkúr and the neighbouring villages. But the greatest number of pupils are in those in the Market Street at Mysore, and in the Main Street, Bangalore Petta. The majority of the schools have obtained favorable reports from the inspecting officers. But those at Gulur and Kyatsandra seem to stand in need of better supervision, and the Mandya Street School, Mysore, was not found in a satisfactory condition.

99. *Tamil and Telugu.*—Of the four Tamil and Telugu schools, the Chatur-Veda-Siddhanta-Sabha Seminaries occupy the most prominent position. They contained at the inspection 238 pupils on the roll, of whom 172 were present. The Tamil branch is described as being in an effective condition. The Telugu classes did well, but the attendance in this branch had been low and irregular throughout the year.

100. *Sanskrit.*—Ten Sanskrit schools partake of Government grants-in-aid. The Chikballapur School is a pleasing and advanced institution which has gained a widespread reputation and attracts students from many distant parts. The Muttur School merits commendation. I regret that the large and old established Melkota School has been managed with so much laxity as to imperil its existence. The grant was suspended for a time to allow of satisfactory arrangements being made. A grant for a Sanskrit school was given to the Jain sect at Shravanbelgola.

101. *Hindustani and Persian.*—The Hindustani and Persian schools receiving aid from Government number 26. They are hardly to be judged by the standard of Government Schools, but a decided improvement is perceptible in many of the institutions as regards the system of instruction and the character of the text books used. The large Bangalore Madrasas strive to keep abreast of the wants of the day, and in most of the schools situated in large towns the managers are sufficiently enlightened to desire improvement in the style of teaching pursued under their supervision, and are not averse to acting upon advice given them with this view. The Madrasa in the Cantonment under Abdul Khudus is very carefully looked after. The Muhammadia and Sultania Mad-

rasas also continue to do well. The instruction in the latter is of a high standard in Arabic and Persian. The Channapatna and Shrinivaspur Schools are favorably mentioned.

D. Aided Female Schools.

Bishop Cotton's School.
Wesleyan School.
Convent of the Good Shepherd.

102. *Higher Class.*—The course of study adopted in *Bishop Cotton's School* for the advanced girls, who have been formed into a college class along with the boys, was referred to in last year's report. Dr. Pope alludes to the subject in a recent annual statement, in the following words:—"We are doing nothing more than striving to give to those elder girls who desire it the kind of education that would enable them to pass the middle class examinations which have done so much good in England. We teach a little Latin and this will make English Etymology easier; a little algebra and this renders arithmetical processes intelligible; a little geometry and this accustoms them to accurate reasoning." These studies appear therefore to have been so far abandoned as that they are optional, and only taught to girls who desire it. The arguments for their continuance are manifestly weak. The reports on the *Wesleyan School* and the *Convent* are generally favorable, especially in the case of the latter.

103. *Middle Class.*—The *Saint John's Schools* for girls and infants are entitled to share in the praise already accorded to the institution generally. Pains have been taken to secure qualified mistresses and improve the instruction given to the girls. The midday meal provided for the poorest children is a boon rightly appreciated. *Miss Ferguson's*, a Mixed School in Shule, appears to be doing well, though somewhat reduced in numbers. Among the other schools the *London Mission Boarding School* is entitled to commendation.

104. *Lower Class.*—Under this head come 14 Kanarese Schools, 4 Tamil, and 2 Hindustani. The majority of the Kanarese Schools and one Tamil are connected with either the London or Wesleyan Missions, and thus enjoy the advantage of supervision by European ladies. The reports are uniformly favorable upon these institutions, and there is no doubt that an important influence is being indirectly exercised upon native society by means of the instruction imparted and the general associations of the schools. Of the purely native schools, namely, one Kanarese School at Chitaldroog and one at Seringapatam; one Tamil and two Hindustani Schools in Bangalore; the only one that can be spoken of in unqualified terms of praise is the Tamil institution. This has been in operation 20 years, and reflects much credit on the management. Very much remains to be done in improving the Hindustani girls' schools before they can be considered as fulfilling their proper functions. The Nazim of the Cantonment School has other calls upon his time which prevent due attention to its interests, and the Nazim of the Petta School complains that funds will not allow of his keeping up a proper staff of teachers. Instruction in needlework and embroidery has been given up in both schools, and the first removed to a situation less suitable than the one formerly occupied.

Fees.		Pupils.			
Total Amount realized.	Average per Pupil.	Hindus.	Muhammadans.	Others.	Total.
7,042	3—7—5	1,482	133	536	2,151

E. PRIVATE UNAIDED SCHOOLS.

105. The returns received from the Deputy Commissioners of Districts and from Missionary Societies shew a grand total of 1,536 private unaided schools, with an average daily attendance of 18,914 pupils. The number of Hindu schools is returned as 1,439, and of Muhammadan as 47. The income obtained from fees was Rs. 50,995, and from other sources Rs. 3,349.

106. The distribution of indigenous schools throughout the Province is exhibited in the accompanying table. As many of these as fall in the way of the Sub-Deputy Inspectors are visited and the number of pupils noted. The character and system of instruction have been fully described in previous reports. It is worthy of remark that the school books issued by Government are often found in use in these schools, especially in those situated in the large towns.

District.	Schools.	Pupils.
Bangalore ...	237	4,103
Kolar ...	169	2,078
Túmkúr ...	305	3,411
Mysore ...	208	1,654
Hassan ...	152	1,509
Shimoga ...	103	1,402
Kadur ...	137	1,450
Chitaldroog ...	204	2,628

107. Comparing the statistics in para. 105 with those for last year, we find that the average of 12 pupils to a school still obtains. This is only about half the average of pupils to each hobli school. The Hindu schools have apparently increased in number by 52, while the Muhammadan schools have diminished by 14. The income of each school was Rs. 33—6—5 a year, which gives 3 annas 8 pie per mensem for each pupil.

VII. SCHOLARSHIPS.

108. Full details were given under this head in the last report. The only alteration calling for remark is, that a proportion of the allow-

ances in the High School and Raja's School have been allotted to the District and Taluk Anglo-Vernacular schools for matriculated students who undertake to carry on their studies in the two first named institutions for the higher University Examinations. The sum of Rs. 25 has been thus appropriated in each case, the remainder of the amount allowed being left at disposal of the Principals for distribution to local applicants according to merit.

VIII. BOOK DEPARTMENT.

A. Book Depôts.

Stock.

109. The stock of books in the Central and Branch Depôts on the 31st of March 1874 was of the value of Rs. 47,440. There were added to the Central Depôt during the year 23,224 books at a cost of Rs. 13,344. The number of books supplied to Branch Depôts for sale was 21,359 valued at Rs. 7,348.

Sales.

110. The amount realized by sales of books and paid into Government treasuries was Rs. 18,043, or about the same as last year.

Curator.

111. The issue of books was found to be made on too lax a system, especially in the case of Hobli schools, and proper means and checks had not been devised for insuring that all articles delivered were duly accounted for. A minute scrutiny into these matters revealed such culpable carelessness on the part of the Curator that it became necessary to remove him from the charge of the Depôt. Mr. Steele, Head Master of the Kolar School, was appointed to the office, on condition of paying a certain amount as security, which, it is now rightly decided, shall be demanded from any individual holding this responsible position. At the same time the system of accounts was thoroughly revised, and the whole placed on a safer and more satisfactory footing.

B. School Books.

112. In pursuance of a Resolution of the Government of India, a Committee composed of the gentlemen noted in the margin was appointed to report on the books in use in the schools of Mysore and Coorg, and to submit suggestions regarding them. To aid in the examination of Hindustani, Persian, Arabic, Sanskrit and Telugu books, Messrs. Muhammad Ali, Khazi Shah Abdul Khudus Khadri, Narasimmaiya and Srinivasachari were afterwards associated with the originally appointed members.

Committee on School Books.

L. Rice, Esq., President.
Captain J. S. F. Mackenzie, Secretary.
Revd. G. U. Pope, D. D.
C. Rangacharlu, Esq.
T. R. A. Tambu Chetti, Esq.

113. The Report submitted by this Committee has been reviewed by the Chief Commissioner and forwarded to the Government of India, whose orders thereon are now awaited. As might be expected an almost endless diversity of character and style was discovered in the books used in various institutions, comprising works in nine different languages. Some, especially a few Hindustani books, it was necessary to denounce as works altogether unfit for public reading. As regards the majority of the books in general school use, whether English or vernacular, they were found to be in many important respects ill-adapted for the purpose to which they were applied. The English books were too often compilations intended for the use of English boys in England, and were not modified and assimilated to meet the wants of youth in India.

Report.

114. The recommendations of the Committee embraced proposals for the compilation of an Imperial Series of works on certain subjects and in certain languages for general use throughout India. For such branches of study as could not be provided for on such an extended scale, the preparation of a Local Series was proposed, which for the sake of economy it was suggested might be undertaken in communication with other Governments having an interest in the vernaculars of this Province.

Recommendations.

115. The main principles insisted on with reference to the general course of instruction, having in view that the education of natives of India was the chief

Principles laid down.

point to be considered, were, that the pupils' vernacular should be more largely made use of than is now the case in imparting instruction in English; that India and not Europe should occupy the prominent place in the illustrations and examples employed inmathematical, historical and geographical treatises; that practical and scientific instruction should be provided for; and that morality should form a subject of direct instruction. It was also recommended that similar School Book Committees should be appointed from time to time under each Administration for the purpose of revising the courses of study and advising in educational matters, both as regards the books in use and the principles of instruction pursued. The creation of a pure vernacular literature and kindred subjects were also touched upon.

Books published.

116. Pending the receipt of the further orders of Government, only such school books were printed as were needed for immediate use or had been approved by the Committee. The following is a list of those published at the Government Educational Press during the year:—

English.	Select Poetry	1,000
	First Book	10,000
Kanarese.	First Book	20,000
	Padya Sara	10,000
	Manual of Cattle Diseases ..	2,000
	Amara Kosha	5,000
	Pampa Ramayana	500
	Bhuvivarane	5,000

Books purchased.

117. In addition to the supplies of school books, maps, &c, received from England by indent through the Secretary of State, the following local publications were purchased for the Department:—

Telugu.	First Book..	200
	Nala Charitra	50
	Colenso's Arithmetic	50
Kanarese.	History of India	100
	Jaimini Bharata	90
	Katha Sangraha	1,350
	Padya Sara Prakasika	50
	Map of India	100
Hindustani.	Barnard Smith's Arithmetic ..	20

IX. LITERATURE.

Annual Review.

118. The annual Review of Literature for 1874 was duly submitted. Among the works registered in this Province may be noticed a small Agricultural Class book, compiled for use in village schools, by Colonel E. Boddam, published in diglot; and an edition of the celebrated Sanskrit Thesaurus, the Amara Kosha, with meanings in English and Kanarese. A Kanarese version of the Manual of the More Deadly Forms of Cattle Disease, by Veterinary Surgeon Hallett, appears under the head of Medicine. The remaining publications were principally re-issues of old works, and fall under the heads Fiction, Poetry and Religion. Of law books, a Police Manual for use in the Mysore Province was published in Kanarese, as also Acts XIII and XVIII of 1855 and X of 1872.

Manuscripts of ancient works.

119. Continuing my inquiries on the little known subject of Kanarese literature, I succeeded in obtaining during the year the following additional manuscripts of old works in that language.

Lílávati—A poetical romance.

Kávyávalókana—A valuable work on rhetoric, by Nága Varma, the oldest known Kanarese grammarian.

Rájávali Kathe—Historical annals of the Jain sect from the earliest times.

Ráma Kathávatára—The history of Rama as handed down by Jain tradition, with much collateral information of value.

Bhadra Bâhu Charita—The history of Bhadra Báhu, a distinguished Jain leader, the founder of the Shravanbelgola settlement.

Giriavva Gita—The songs of Giriavva, a local poetess of the shepherd caste.

Nambaiyana Ragale—A Lingayat work containing 36 rhapsodies by Hampe Haripam.

X. THE PRESS.

120. The only notice required under this head additional to the remarks contained in last year's report is the issue, or revival, of two newspapers in Kanarese, the *Vrittánta Bodhini* and the *Karnátaka Prakâ-*

sika, the former under European and the latter under native management. Both these papers, it is understood, formerly enjoyed the patronage of the late Maharaja, but since his demise they have not been published until the present year. Each contains a leading article and some correspondence in English. The *Vrittánta Bodhini* receives a certain amount of aid from Government, and the copies subscribed for are circulated in the Revenue and other Departments.

XI. SCHOOL BUILDINGS.

Taluk School Houses.

121. Two school houses, of the second class standard design, were under construction during the year by the Public Works Department, one at Hole Honnur in Shimoga District, and the other at Tarikere in Kadur District. "The former was roofed in satisfactorily, and the building would have been finished had it not been for delays arising from the foundations being sunk in treacherous soil. The Tarikere building progressed slowly, owing to the contractor giving trouble." I regret that a proper understanding was not come to with the Educational Department regarding the site on which this school is being erected, as the situation of school buildings with reference to the towns has much to do with securing a good attendance of pupils.

122. The extreme inconvenience to which many schools are subjected for want of premises was mentioned in last year's report. It is a matter for regret that only the building at Húnsúr was sanctioned for erection during the ensuing year out of eight proposed.

Repairs.

123. Repairs were executed to twenty school houses, at a cost of Rs. 4,007. In the case of the Raja's School at Mysore the work was carried out by the Public Works Department. The remainder was done by the Educational Department. The principal expenditure was on the Chikballapur School, Bangalore Girls' School, and the Kadur and Hassan Schools, which have been put into thoroughly good order. An amount of Rs. 72 was expended in enclosing the school grounds at Yelahanka and Hoskote.

124. As stated in a previous part of the Report, building grants were made to the Wesleyan Mission of Rs. 1,000 towards the erection of the Market Boys' School at Mysore, and of Rs. 350 towards that of the Petta Boys' School, Túmkúr.

Building Grants.

XII. CONCLUSION.

125. Having made a tour through the Nagar Division in the cold weather, I was glad to see evident signs of greater interest being awakened in the cause of education throughout that part of the country. As the means of communication, now daily improving, become more perfect, it may reasonably be expected that the Malnad Districts will be behind no others in taking advantage of the opportunities of instruction held out to them by the Government schools.

126. I would conclude this report with an expression of thanks on behalf of the Department for the continual interest shewn in educational operations by Sir Richard Meade, the Chief Commissioner; and for the encouragement received from Mr. Gordon, Judicial Commissioner, while officiating.

127. The Officers of the Administration generally have been ready in aiding the schools situated within their respective jurisdictions, among whom I may particularly mention Colonel Bruce, and Captains Shaw and Ludlow.

128. All the Educational Officers have willingly co-operated in carrying out departmental instructions. Their respective services have been already brought to notice in the body of the report.

I have the honor to be
Sir,
Your most obedient Servant,

L. RICE,
Director of Public Instruction,
Mysore & Coorg.
